## COMPRESSOR

### COMPRESSOR REPLACEMENT STANDARDS

Typical compressor change out includes: Refrigerant recovery; Sample check wiring for proper size and condition; remove old compressor; replace, repipe, connect wiring to new compressor; recharge to recommended specifications; test for proper operation. All compressor change outs include liquid line filter drier.

Sample

NOTE: If compressor motor failed we recommend an acid test to prevent premature failure of your new compressor.

#### COMPRESSOR REPLACEMENT 1 1/2 TO 3 TON IN WARRANTY
